Waukesha Engine Introduces ESM[®] Retrofit Kits

CALGARY — The benefits of Waukesha Engine's latest engine control technology are now available for select models of older Waukesha VHP[®] engines in the form of a new ESM[®] (engine system manager) retrofit kit.

The retrofit kit delivers a package of features designed to maximize uptime and improve engine protection. It includes:

- The ESM control unit with its multiple functions – industry-leading individual cylinder knock detection features, spark timing control, stop/start sequences, diagnostics, fault logging, engine safeties and remote monitoring capabilities.
- An air/fuel ratio controller that maintains emissions levels through load and speed changes.
- An electronic governor to adjust engine speed for varying load conditions.

The initial ESM retrofit kit offering is designed for Waukesha VHP L7044GSI and L5794GSI engines built after April of 2000. Retrofit kits for additional models are also planned.

About Waukesha Engine

Founded in Waukesha, Wis. in 1906, Waukesha Engine, a business unit of Dresser Inc., is a manufacturer of spark-ignited, gaseous-fueled engines widely used in power generation, field gas compression and other mechanical drive applications. Waukesha Engine also packages Enginator[®] gensets and DC switchgear controls for the distributed generation market. Waukesha Engine's manufacturing and power systems facilities, located in Waukesha, are ISO 9001 certified. The company's Web site can be accessed at www.waukeshaengine.dresser.com.
